Small Tortoiseshell  
Peacock  
Painted Lady  
Red Admiral  
Small White  
Comma  
Holly blue  
Small copper

### Dragonfly

Southern hawker - 2021

### Front garden – not deliberately designed for wildlife

During their breeding season blue tits and the sparrows from the colony in the hedge between nos. 30 and 28 come to collect greenfly from the roses.

Wrens and dunnocks like to investigate the paving and the wall.

Pollinators visit all the spring flowers here, then the hardy geraniums in summer and the Japanese anemones in autumn.
